

Rohaannadeem

Full Stack Developer

✉ rohaannadeem2@gmail.com ☎ +923084439359 📍 Lahore, Pakistan 🌐 <https://rohaan02.github.io/>

Experience

Heights Studio

Onsite - Lahore

Full Stack Developer

Dec 2025 – May 2026

- Developed and maintained **full-stack web applications**, delivering end-to-end solutions across multiple technologies and domains.
- Built scalable applications using **MERN Stack (MongoDB, Express.js, React.js, Node.js)**, with additional experience in **Go (Golang)** and **Ruby on Rails**.
- Designed and implemented **frontend interfaces, backend services, REST APIs, and database solutions**, ensuring clean, maintainable, and high-performance code.
- Managed **application deployments** and production environments, delivering secure, scalable, and reliable applications.
- Collaborated closely with engineering teams and technical leadership to translate business requirements into robust software solutions while continuously improving development workflows.

Experts Cloud

Onsite - Lahore

Associate Software Engineer

July 2024 – Dec 2025

- Developed and maintained **full-stack features** using **React, Node.js/AdonisJS, MongoDB, and MySQL**, contributing to **4+ production projects** with reusable and scalable code.
- Built and optimized **RESTful APIs**, improved **MongoDB queries and backend logic**, and reduced response times across key application modules.
- Integrated **AWS services (S3, EC2, Lambda, Cognito)**, **Firebase**, **OAuth authentication**, and **OpenAI LLM APIs**, while managing deployments using **Docker, Vercel, and Netlify**.
- Collaborated in **Agile sprints** with cross-functional teams, delivering **10+ features on time**, maintaining clean code standards, and using **GitHub for version control and code reviews**.

Vision Plus

Onsite - Lahore

ASP.NETDeveloper:-

Aug 2023 - Oct 2023

- Developed and customized **ERP solutions using ASP.NETMVC**, contributing to scalable, enterprise-level web applications.
- Implemented and maintained **backend logic, database integrations, and frontend features** based on client requirements.
- Collaborated with cross-functional teams to deliver **reliable, maintainable, and client-specific solutions** within deadlines.

ASP.NETInternship:-

Jun 2022 - Sep 2022

- Assisted in developing and maintaining **ASP.NETweb applications**, gaining strong fundamentals in **frontend and backend integration**.
- Worked on **WordPress website development and customization**, delivering client-specific UI and functionality updates.
- Strengthened understanding of **full-stack development workflows**, version control, and collaborative development practices.

Education

Bahria University

Bachelor's Degree

Computer Science

2020 - 2024

The Crescent College

FSc

Pre-Engineering

2018 - 2020

Crescent Model Higher Secondary School

Primary - Matric

Sciences

2008 – 2018

Projects

Client project: Caleo Pro

May 2026 - Present

Caleo Pro multi-tenant workforce-management SaaS for U.S. public-safety agencies

- **Production Delivery:** Core engineer on a multi-tenant serverless SaaS (GraphQL/Apollo on AWS Lambda, MongoDB, two React + MUI frontends) serving multiple U.S. government agencies; owned features end-to-end across backend, frontend, and cloud infrastructure.
- **AWS / GovCloud:** Provisioned a new AWS GovCloud environment: partition-aware Serverless config, Terraform-managed Cognito auth, and a cross-partition delivery pattern (commercial CloudFront + ACM fronting GovCloud S3, since CloudFront is unavailable in GovCloud).
- **Email Infrastructure:** Migrated transactional email from Amazon Pinpoint to SES (GovCloud has no Pinpoint) domain identities, DKIM, custom MAIL FROM, DMARC records, and SES production access and root-caused remaining deliverability failures to the receiving mail system rather than AWS.
- **CI/CD & Quality:** Hardened GitHub Actions pipelines across 3 apps, making TypeScript + ESLint hard gates on every PR and deploy, and maintained an 880+-test Jest suite under a per-ticket test-plan discipline.
- **Multi-Tenancy & RBAC:** Replaced per-feature flag plumbing with a shared org-identity tenant gate (frontend + backend), and audited a half-migrated RBAC permission layer to eliminate intermittent authorization failures that were blocking QA.
- **Event-Driven Systems:** Built notification scheduling on EventBridge Scheduler (retry + dead-letter queue) with MongoDB change-stream detection of shift-time changes; maintained the DocuSign e-signature overtime-slip pipeline, root-causing misrouted slips to a stale deployment and missing data backfill.

<https://www.caleopro.com/>

Skills

Frontend

ReactJS, NextJS, JavaScript, TypeScript, Material-UI (MUI), Bootstrap, Tailwind CSS, Axios, Elementor / WPBakery (WordPress page builders)

Backend

AdonisJS (v6), Node.js, Express.js, C#, TypeScript, Docker, Java (basic), Go, RESTful APIs, GraphQL, JWT/OAuth, RBAC, Socket.IO, API design & testing

Database

MySQL, PostgreSQL, Firebase Realtime DB, MongoDB

Cloud & DevOps

AWS Lambda, S3, Cognito, AWS Serverless, AWS AI Services (completed AWS Practitioner AI course), EC2, IAM, Deployment, Elastic IP, RDS, SES, Pinpoint, CloudFront, Route 53, ACM Certificate, GovCloud, Deployment: (Vercel and Netlify)

Technology

MERN Stack, ASP.NET, Ruby on Rails

Tools

Wordpress, Jira, Postman, Git & GitHub, VS Code, Docker

Testing

Jest (unit + integration), Cypress, Happo.io, QA test planning, TypeScript strict typechecking as a CI gate

Publications

Extraction of User-Defined Information from PDF

January 2025

IEEE

- **First author and lead contributor**, responsible for project design, core implementation, and driving the research and publication process.
- Addressed the challenge of **extracting user-specific and unstructured data from PDFs**, which is difficult due to varying layouts and formats.
- Proposed and implemented a **web-based MERN solution** that allows users to define custom data fields and accurately extract information from PDF documents.
- Beneficial for **organizations, researchers, and businesses** needing efficient, automated data extraction from PDFs for reporting, analysis, and decision-making.
